

Seed Master 250-28

This machine allows accurate and gentle placement of sweet potato seed in a uniform manner, down a 28" to 36" bed width. It provides you with the ability to bed thousands of bushels per day with only 2 operators. The 250 bushel capacity hopper empties in about 3 minutes. Fully adjustable conveyor speed allows correct seed placement. Extra heavy duty floating tandem axles will travel smoothly over all field conditions.

Overall Length: 18'8"

Overall Height: 8'4"

Wheel Centers: 84"

Hopper Construction: 14 ga. carbon steel formed and welded with braces and stiffeners in stress areas for added strength

Hitch: heavy duty pull-pin type

Conveyor: 28" width driven by hydraulic motor with adjustable flow control

Operating Speed: 2.5 to 5 mph

Overall Width: 10'

Weight: 3640 lbs-machine full 16140 Lbs

Hopper Capacity: 250 bushels

Tongue Jack: 10,000 lb drop leg jack

H.P. Requirement: 80 hp and up
